

EDUCATION

We specialize in the design and development of school district and higher education technology programs & services for both capital projects and on-going support.

CORPORATE

Our considerable experience in the financial, health care, manufacturing, and utility industries allows us to develop the most sensible solutions for our customers.

COMMUNITY

Whether for a town, city, county or region, our focus is to enhance economic development, educational, health care and public safety initiatives through the use of collaborative community-based telecommunications programs.

GOVERNMENT

We conduct comprehensive assessments, design, and management of technology and communication infrastructures and systems to best meet and support the organization's goals and objectives.

HEALTH CARE

We provide one of the most cost effective ways for your facility to connect to the Medicare system. We have solutions that range from the single user to hundreds of simultaneous users.

Security & Surveillance

ECC Technologies provides a comprehensive approach in a design and implementation of an organization's security plan. The design, specification and project management for security systems include the integration of intrusion, access control, and surveillance video within buildings and across network environments.

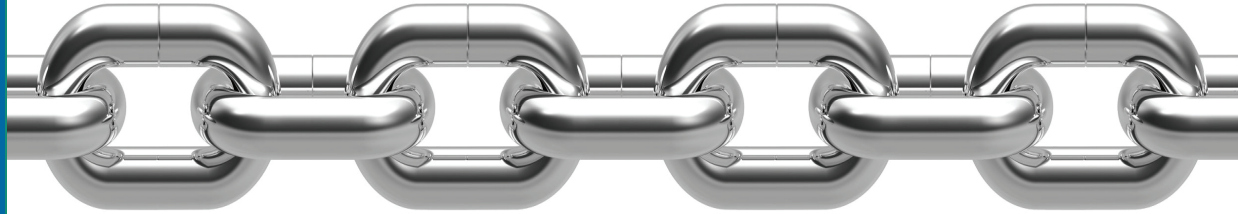

Security design needs to take into consideration the requirements of the organization, while monitoring and controlling accessibility to the public.

ECC Technologies supports government, education, healthcare, and other public/private facilities.

Protecting & Securing Our Facilities...

- Security Assessment & Design
- Intrusion Systems
- Access Control
- Identification Systems
- Surveillance Video
- Storage Systems
- Enhanced 911 & Emergency Communications
- LAN/WAN Network Integration & monitoring

Reference Projects:

Niagara Frontier Transportation Authority – Buffalo, NY:

\$10million security surveillance and access control system for all Light Rapid Rail, Transit and Airport facilities throughout metropolitan Buffalo, NY. ECC responsible for all network infrastructure design and integration services supporting enterprise-wide Pelco Endura Surveillance System and Tyco Andover Controls (TAC) Access Control Security System.

Project scope includes design and project management of fiber optic ring around Buffalo Niagara International Airport for security applications including megapixel fixed, PTZ, thermal and license plate cameras and video analytics.

Monroe Security & Safety Systems, Inc. (M3SI) – Rochester, NY:

M3SI is a local development corporation, formed to design, install, manage and operate public safety security, surveillance and communication systems. ECC is responsible for security surveillance network design, installation and support; and mobile data network integration and support services for all metropolitan police, sheriff and emergency services vehicles. Project scope includes developing more than 100 miles of fiber optic infrastructure to interconnect county facilities, water treatment plants pumping stations and reservoirs, and public safety communication towers.

Livingston County Skilled Nursing Facility – Mt. Morris, NY:

Telecommunications and network consultant for new 90,000 sqft. skilled nursing facility. ECC responsible for design and installation management of new cabling infrastructure, telephone system, Cable TV distribution system, public address, clock, security and surveillance systems. The project scope included design and construction administration of patient wandering system, resident TV services and an integrated security system for intrusion detection, access control, badging and video surveillance.

Auburn Enlarged City School District (AECSD) – Auburn, NY:

ECC was the security consultant for AECSD capital project. Responsibilities included an district-wide security assessment where recommendations were incorporated into the then current capital project. An integrated intrusion detection, access control and video surveillance system was implemented for all district facilities.

Baldwinsville Central School District – Baldwinsville, NY:

ECC provided a district wide security assessment and developed a Security Master Plan (SMP) focusing on immediate implementation of a district wide controlled access plan. The four phase project approach provided both short and long term plan objectives towards improving district security.
