NYS ConnectALL office presents Broadband Deployment Initial Proposal

The ConnectALL office of in NYS has issued their initial proposal volumes 1 and 2 for their Broadband Deployment plan.

These proposals describe how the state views the most effective way to invest the \$664 million from BEAD to attract private investment and reach unserved locations through a mix of Fiber and Wireless technology – with an emphasis on Fiber.

Volume 1 details existing broadband funding, unserved and underserved locations, and community anchor institutions. As well as the challenge process for locations.

Volume 2 provides additional detail on ConnectALL's approach to project areas and selection criteria.

Wayne County NY partners with ECC to oversee the construction of their Broadband Project.

ECC has been supporting the County with Broadband planning, and GIS mapping and analysis for many years, laying the groundwork for this comprehensive Broadband public-private partnership with Charter Spectrum; the Internet provider building out their infrastructure to expand coverage and services to the Wayne County communities.

What is involved:

1. Bi-Weekly Progress meetings
2. Project Schedule and Milestones
3. Construction Management
4. Address Survey and GIS Database
5. Monitoring and Documentation
6. Submittals and Payment Application review
7. Acceptance Testing
8. Assistance with ARPA Reporting
9. Final GIS Database development and deliverable

About us

WHO WE ARE

ECC Technologies was incorporated in 1995 to provide technology and communications consulting services to Educational, Community, and Corporate (ECC) clients. This was at the time when the nation's telecom-communications industry was changing drastically through deregulation.

For the past several decades, ECC has provided technology, broadband, and security consulting services to education, municipalities, government, and corporate clients.

ECC continues our mission to assist clients with the expansion of broadband and the implementation of technology and security solutions in communities to improve economic development, public safety, education, and health- care services

Success Stories – ErieNet Sales, Marketing, and Operations Support

About

The 400-mile network backbone will connect all viable municipal entities, as well as key community anchor institutions (CAIs), such as business, educational, and healthcare entities. In addition, the network will be available to any viable entity in Erie County that wishes to subscribe to the network.

ECC Technologies conducted the initial study for the open-access network on behalf of Erie County in 2017. We also developed the business plan in which Erie County will operate the nearly 400-mile middle-mile fiber-optic network.

"Our firm is now 100% accountable for the success of this project," - ECC Technologies Vice President Matthew Crider.

"This is a significant undertaking for the county," said ErieNet Chairman Thomas Baines. "I think the outcome is really what's most important."

How to get connected

If you would like to learn more about the network and how to get your community connected contact Ty Rizek at:
